

DIY Diwali Lantern

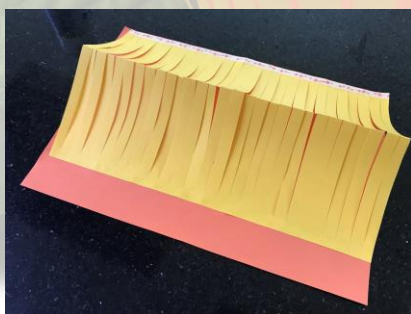

YOU'LL NEED:

- 2 sheets of coloured paper
- Scissors
- Glue
- Stapler

STEP 1: Fold one sheet of paper in half across the long edge. Make cuts approx. 1cm wide starting at the FOLDED edge (but don't cut all the way through)

STEP 2: Glue the sheet of paper with the cuts in it to the base sheet –glue the long edges together at the top & glue the bottom edge about 5cm up from the bottom edge of base sheet.

STEP 3: There should be a strip of paper about 5cm thick at the bottom of your base sheet. Trip this off to make the handle.

STEP 4: Make a cylinder out of your glued sheets of paper. Glue the short edges together & staple the handle on.

TIP:

Add a strip of coloured tape or different coloured paper to the top of your lantern to add more interest.
