Do you own this trailer?

Simple action is recommended to ensure your trailer is fit for purpose into the future.
Please contact your local store for further information.

What's the issue?

We have identified a potential issue with the six points where the trailer tray connects to the draw bar. The bolts and washers at these points should be larger than the ones currently used and need to be replaced. Movement over time or overtightening of the bolt with power tools may cause a weakness that should be identified in a Warrant of Fitness inspection.

This is not a safety concern, but Mitre 10 is committed to ensuring our products are fit for purpose, so we are taking proactive action to rectify this issue.

For further information please call 0800 4648 731 to be connected to your nearest Mitre 10 store. Or visit mitre10.co.nz to locate your nearest Mitre 10 store.

Issued: February 2019
