

TOILET ROLL BIRD FEEDER

This is a fun and easy project for the kids to do using materials that can be found at home.

YOU'LL NEED:

- Empty toilet paper rolls
- Bird seed
- Peanut butter
- String/twine

STEPS:

1. Spread peanut butter on the empty toilet paper roll.
2. Use a large container or baking pan to lay the bird seeds out.
3. Roll the peanut butter covered toilet paper roll with bird seeds.
4. Thread in the string/twine through the hole of the toilet paper roll and tie a knot.

Tip:

- Other nut butters such as almond or soy butter can work as a glue too. Alternatively, you can make your own natural glue using; 1 cup flour, 1 ½ cup water, 1/3 cup sugar and 1tsp vinegar.
- If you don't have bird seeds on hand then food such as small pieces of apples, bananas, peanuts, raisins and hard cheese will work too.

All projects should be carried out under competent adult supervision and using appropriate equipment.
