

Site Sustainability Awareness Board

Supporting the Onsite Waste Management Plan

Last updated:

Minimum number of sorting stations throughout this construction project.

% of Waste Material recycled to be reduced from landfill.

Number of sessions given to team members about process with waste management plan.

% of Waste Material to be repurposed throughout this construction project.

How can you help our success?

- Put the right things in the right bin when disposing of unwanted product or waste.
- Talk to if you have any ideas, suggestions with our waste management plan.
- Attend our next on-site meeting to hear progress with the waste diversion and waste management plan.
