

PET TURTLE GARDEN ORNAMENT

This is a fun and easy project for the kids to do using materials that can be found at home.

YOU'LL NEED:

- x1 large stone
- x5 small stones
- Paint
- Felt marker
- Paint brush or sponge

STEPS:

1. Paint all stones using a paint brush or sponge
2. Once the stones are dry, create the shape of a turtle by placing the larger stone in the middle (this will be the shell). The smaller stones will be the head and legs as shown in the picture.
3. Now you can draw patterns using a felt marker on the rocks representing the eyes, mouth and shell.

Tip:

To make the paint colour of the turtle brighter, use white paint first as the base. Apply the green (or other coloured paint) once the base is dry.

All projects should be carried out under competent adult supervision and using appropriate equipment.
